

Developing Effective Assignments for Learning Assessment

I want to know if _____ (who) can _____
_____ (do what).

WHY?

List 3 *different* products that could provide evidence to answer this question.

Which product would most readily provide evidence that would answer the question?

Elaborate on what this “assignment” would look like (e.g. directions or description):

What COMPONENTS (3-5) of the evidence would specifically address the question, and also supply enough depth of information that specific action steps could be taken, if need?
