

Documenting Classroom Assessment Techniques (CATs) Reporting Template

Briefly describe your CAT:

Purpose: What did you hope to learn? What did you want to know?

How did you implement it? (When? Any group discussion? Think-Pair-Share? Collect at end of class?)

How did the students react? How did you give them feedback?

What did you find out about student learning?

Did you get the information you wanted?

How did you/will you use the information? Did you adjust your planned classroom session? Will you try something different next year? Did the CAT validate your teaching?

Is there any literature you can cite that supports your position/relevant teaching philosophy/ findings to demonstrate scholarly teaching?

OPTIONAL:

If you asked a colleague to review your documentation of your CAT, how did their response affect your interpretation of this experience? Did it enhance or change your reaction to the findings? Will it impact your response to the findings? If so, how?
